

## 2 Way Transmitters

### AS-2381TW-FM

Autostart™ AS-2381TW-FM 2-way LED is reknown for its incredible range, ruggedness and compact design transmitter. The AS-2381TW-FM includes all the practical features of a 2-way LCD transmitter but with the simplicity of a 1-way system. All information is easily read and translated through a simple patented button illumination and audible confirmation system.

The 2381 now uses the SUPER SLIM 9mm thick ASRF-3515 remote, and is available in 6 hot colour casings.

### AS-2471TW-FM

The Autostart model AS-2471TW-FM is a hybrid remote start system including the slimmest 2-way LCD transmitter on the market! A combination between the simplicity of a 2-way LED system added with a small LCD display providing clear concise information. Custom remote starter programming can be processed directly with the remote control.
