

## 2 Way Transmitters

### AS-2461TW-FM

6-button FM LCD transmitter

A hybrid 2-way LCD system with an ultra-slim transmitter. A combination between the simplicity of the 2-way LED and a small LCD display providing clear and concise information. Custom car starter programming can be done directly with the remote control.

FM Technology

Vital Tach System

Automatic / Manual transmissions

Two Way Transmitter

Fastest confirmation of any two-way systems

### AS-2371TW-FM

All the practical features of a 2-way LCD transmitter with the size, ruggedness and simplicity of a 1-way system. All information is easily read and translated through a simple patented button illumination system and audible confirmation

FM Technology

Vital Tach System

Automatic / Manual transmissions

Two Way Transmitter

Fastest confirmation of any two-way systems

### AS-6870TW-FM

### AS 6850tw- FM

## Remote Start with Alarm System

The AS-6870TW-FM is Autostarts top of the line LCD remote start and alarm combo. One of the key advantage of this revolutionnary transmitter is the addition of a 2-angle LCD vehicle display. Displaying the vehicle either from the side view or the front view, the screen is capable of showing accurately the nature of the alarm trigger without any guess work. Along with large useful icons for quick reference, the 6 alphanumeric characters section will display information that the end-user can clearly read.

The HDX technology : full duplex mode for fast response time and maximization effective range

XPRESSKIT interfaces to integrate with security and remote start systems

Manual/Automatic transmission

Programmer ready : Installation and diagnostic

Vital Tach System

Data-To-Data™ full duplex communication

FM Technology : better immunity to noise and interference than the AM transmission

**Built-in basic alarm system**

SmartStart Compatible with BlackBerry®, iPhone® or Android®
